PROFILE

Certified developer driven by problem solving, with a background in architecture. Experience working in interdisciplinary teams throughout the design process and used to communicate graphically.

SKILLS

- HTML / CSS
- JavaScript / TypeScript
- React
- Angular
- Node.js
- Express
- PostgreSQL
- MongoDB
- Unit / Integration Testing (Jest)
- Git version control
- Agile

PROJECTS

MY FLIX (April 2022)

- Built the entire application from frontend to backend: it gives users access to movie information, such as: title, genre or director
- Developed its own API, database in MongoDB, business logic and authentication and the client-side in React with JavaScript

MEET APP (July 2022)

- Built a progressive web application (PWA) in React that allows users to search for events hosted in a particular city
- Developed this application following test-driven development (TDD) supported by Jest and used AWS Lambda as authorisation server for issuing OAuth2 authentication

EDUCATION

FULL-STACK WEB DEVELOPMENT

Career Foundry Bootcamp

January - September 2022

MASTERS IN ARCHITECTURE

University of Lisbon

2013

EXPERIENCE
